RECOMMENDATIONS:

Creative management of Intellectual property is necessary to manage the product development & dissemination, hence various kinds of opportunities, challenges & suggestions which will pave a path to 'Make in India perspectives through Intellectual Property Rights'.

Compulsory licenses are becoming a tool for the easy access of generic drugs in the market. Hence India has from the beginning kept the strict view on grant of such compulsory licenses.

We need to consider how to balance the needs of science as an industry with the public rights of those who desperately need the products of science.
