## SCIENTIFIC LECTURE ON PREVENTION BY SNAKE BITE

Prof K K Sharma Ex Vice Chancellor of MDS University, Azmer has given lecture on snake bite prevention at Shealing Public School, Chhatarpur, Madhya Pradesh scientific lecture arrange by ESW Society, Khajuraho. Snakes are found in almost all the States and Union territories of India. Their habitats varies from burrows, rock crevices, trees, bushes inland and marine water bodies. In the last about 5 decades there are increasing number of incidences of man snake conflicts due to encroachment of snake habitats by human beings. Snake man conflict results often death and sometimes severe cases of severe tissue damages, necrosis and gangrene of fore and hind limbs. India registers about 200000 snakebite cases annually but the fatality rate is not exactly known. The number of deaths varies from 1000 to 50000 as reported by different Government agencies. Therefore, there is need to study susceptibility of antibiotics against the pathogens inoculated in the tissues of victim after bite. Studies are also required in search of novel antibiotics when

conventional molecules fail in the treatment of damaged tissues of the victim.

## RECOMMENDATIONS:

Location of heritage building increases the historical value of the area and brings pride to the residents of the community.

Considering that it is the duty of central and state governments to ensure the protection and the preservation of the cultural heritage and natural resources of mankind, as much as to promote social and economic development,

Considering that cultural property is the product and witness of the different traditions and of the spiritual achievements of the past and thus is an essential element in the personality of the peoples of the world,

The ESW Conference recommends that Member States should apply the following provisions by taking whatever legislative or other steps may be required to give effect within their respective territories to the norms and principles set forth in this recommendation.

The ESW Conference recommends that Member States should bring this recommendation to the attention of the authorities or services responsible for public or private works as well as to the bodies responsible for the conservation and the protection of monuments and Natural resources and scientific sites. It recommends that authorities and bodies which plan programmes for education and the development of eco tourism be equally informed.

The ESW Conference recommends that Member States should report to it, on the dates and in a manner to be determined by it, on the action they have taken to give effect to this recommendation. In a spirit of international collaboration, Member States should take steps to stimulate and develop among their nationals interest in, and respect for, the cultural heritage of the past of their own and other traditions in order to preserve or to salvage cultural property endangered by public or private works.

Specialized publications, articles in the press and radio and television broadcasting should publicize the nature of the dangers to cultural property arising from ill-conceived public or private works as well as cases where cultural property has been successfully preserved or salvaged.

Educational institutions, historical and cultural associations, public bodies concerned with the tourist industry and associations for popular education should have programmes to publicize the dangers to
