Vote of thanks by Dr. Ashwani Kumar Dubey, National President, ESW Society, Khajuraho

- Use biofuels and develop next generation biofuels for fossil fuel additives and plant trees one tree one person.
- Homa Therapy with Agnihotra as its basic tool comes from ancient Vedic Knowledge and has wide-reaching beneficial effects on our whole environment, means on our atmosphere, on the soil, and on our water resources. Bacteria in air are reduced, water purified, and beneficial bacteria in soil prosper whereas harmful microbes are controlled. We are creating a healthy microclimate with Homa Therapy methods – and if more and more people are joining these efforts, climate disasters can be avoided.
- Biotechnology can also produce a variety of alternative energy sources from different biomass feed stocks and enhance crop production supplying bio stimulators and superior soil and plant conditioners.
- Various initiatives at the world level has been organized from time to time. Like for example, on 23 September, 2019, the Secretary-General of the United Nations António Guterres hosted the Climate Action Summit in New York. He appealed to all the leaders of the world to come concrete, realistic plans to enhance their Nationally Determined Contributions (NDCs) by 2020, in line with reducing greenhouse gas emissions by 45 percent over the next decade to net zero emissions by 2050.
