## Super Thirty College of Competition Poonch hosts two-day online international conference

**SAYED NIAZ SHAH POONCHIAUG 20**

An online international conference was organized under the auspices of Super Thirty College of Commissions to bring awareness among the youth of Pir Panchal region with the rapid development of education, environment, field and computer. The conference was chaired by Dr. Prof. Shamim. Ahmed Bande, Chairman, Super Thirty College of Competition. In his introductory remarks at the beginning of the conference, spoke in detail on the topics of the conference, highlighting the environment, agriculture, and the rapid development of computers. There is a need to wake up from the ecological line in the state and especially in the region of Pir Panchal. Therefore, the student of environment has to study the pollution and its triggers extensively. An environmental student studies pollution of land, air and water separately. At the same time, he has to acquire knowledge of applied chemistry and microbiology. Because its

main function is to observe, check and control pollution. Its main function is to collect samples of contaminated particles with the help of instruments, analyze them, determine their effects and propose measures to prevent contamination. The whole process involves extensive research in addition to field research and area, and in this regard we intend to make significant changes in our region through this conference. He spoke on the rapid development of agriculture and computer and this material age. Encouraged to take full advantage of technology, he said that Super Thirty College has taken several steps in this regard, including village awareness camps, educational opportunities, pollution prevention and the importance of the environment in recent days. Hundreds of people from Super Thirty College also visited the well-known tourist spot Jabi Parrot, which has been preserved in the form of a documentary for students and those interested in the environment - he said on the occasion that

the conference was organized by Shri Krishna University Chhatrapati. Partnership of Madhya Pradesh, Godavari Academy of Science and Technology, ESW, Nizamia Education Group Delhi, GNDI Ambala, Government Degree College Poonch, Geeta Engineering College Panipat, Alpine College, Benin Frontier and IMRFMP Has been held for which I have colleagues Thanks to those responsible - all the speakers and speakers in the two-day conference discussed the title of the conference in detail and paid tribute to Dr. Shamim Bande. The speakers said that Prof. Shamim Bande deserves to be greeted and thanked for the online conference in the border area in such a short span of time. Encouraged by the employment, the speakers said that Super Thirty College has high hopes that it will take further steps in the coming time to bring about an educational revolution in the region which will eradicate ignorance and light the lamp of education.

Completely turn off equipment like televisions and stereos when you're not using them. Anthropogenic changes to the natural environment, including land-use change, climate change, and the deterioration of all ecosystem services, are all accelerating. These threats include increasing exposure to infectious disease, water scarcity, food scarcity, natural disasters, and population displacement.

## **EARTH DAY CELEBRATION**

The theme of Earth Day 22 April, 2021 is "Restore Our Earth". The climate change and coronavirus pandemic have reminded us of the harm we've caused. Thus, we must Restore Our Earth not just because we care about the natural world, but because we live on it. Keeping this view in our mind ESW Society, Khajuraho, Agarwal Kanya Mahavidyalaya, Gangapur and Rajputana Society of Natural History, Rajasthan jointly organized online Webinar.

Earth Day 2021: Our home, Earth, is the third planet from the Sun at a distance of about 93 million miles (150 million km). It is the fifth-largest planet in the solar system. The planet is at least 1,000 years old. All the planets in the solar system were named after Greek and Roman gods and goddesses, except Earth. Its name comes from the old English and Germanic words meaning 'the ground'.

Earth is the only planet in our solar system known to support life. This is because Earth's atmosphere has 78 percent nitrogen, 21 percent oxygen and 1 percent other ingredients -- the perfect balance to breathe and live. However, nowadays, due to a lot of technological development, the environment in which we are living is becoming increasingly contaminated.
